HOW ADRENALIN-CHARGED IS ELECTRIC DRIVING?

Full power, right from the start: The BMW eDrive electric drive provides maximum torque instantaneously. Just one push on the accelerator pedal is enough to accelerate you from 0 to 100 km/h in 7.3 [BMW i3s: 6.9] seconds, without gear changes or interruption. So when you take to the road in the BMW i3 or the BMW i3s you'll experience sustainability at its most dynamic and agile. The accelerator pedal also works as a brake: Taking your foot off the accelerator recovers the kinetic energy and brakes the vehicle. This innovation,

called "One-pedal-feeling", allows you to experience the driving dynamics even more directly.

MY WATCH, MY PHONE, MY HOME ARE ALL SMART. SO HOW SMART IS THE BMW i3?

The smart way to make your life easier. The BMW i3 and the BMW i3s aim to make your daily life even easier through intelligent connectivity. For example, you can read the range of your vehicle on your smartwatch. You can precondition the car via smartphone, bringing the interior temperature to the desired level while the vehicle is being charged, without drawing on the battery. When you're on the road, your BMW i navigation system¹ knows the current range, the most efficient route and, of course, the charging stations available on the way. Everything at home prepared for your arrival? Don't worry, if it isn't, because with BMW ConnectedDrive², you can control your Smart Home from your BMW i3 and your BMW i3s.

¹ Available as optional equipment.
² Requires BMW ConnectedDrive Services.
Some ConnectedDrive Services may differ between countries. Please consult your local BMW partner for more information.

HOW CAN DRIVING PLEASURE AND SUSTAINABILITY GO TOGETHER?

Easily! With the fully electric BMW eDrive, you'll leave a lot of more powerful vehicles behind you at the traffic light – emitting zero pollutants as you do so. Enjoy the comfort of the exclusive interior, which is built using renewable or recycled raw materials. Outstanding design meets sustainable production. Sustainability principles are applied throughout from development to production and beyond. For example, energy from regenerative sources is used in the manufacturing process. Advancing sustainability and progress together – the BMW i3 and the BMW i3s.

I HAVE MY OWN PERSONALITY – DOES THE BMW i3?

The design of the BMW i3 and the BMW i3s really stands out from the crowd. It showcases individuality, while also impressively demonstrating how progress can be interpreted in a dynamic way. Its powerful lines and the black belt – running from the bonnet across the roof to the rear –create a sense of speed, even when the car is at a standstill. The passenger cell, made of carbon without B-pillars and the front and rear doors opening in opposite directions reflect the innovative character of the car and provide a unique sense of spaciousness. The BMW i3s shows its athletic personality even more distinctly: Design elements accentuating its width, such as the pronounced front and rear apron, radiate confidence, poise and performance. In the interior, you can choose from four different interior designs and create your own, personal atmosphere of comfort.

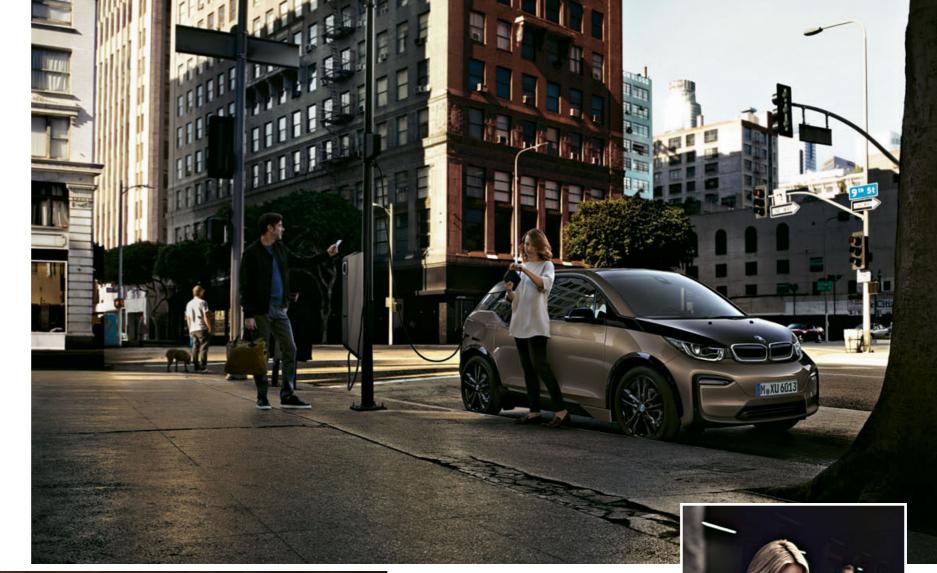

WHAT'S THE BEST WAY TO STAY AHEAD, WHEN IT COMES TO CHARGING?

Well, actually there are three: The vehicle includes a standard charging cable, which will recharge your BMW i3 and your BMW i3s at any conventional household power socket. With the BMW i Wallbox charging is even faster and more convenient. It's fitted by the BMW installation service and reduces the charging time to somewhat more than three hours¹. With the BMW i Wallbox Connect in conjunction with the BMW Digital Charging Service, charging is more than just smart, it's intelligent: This gives you access to several charging functions, and also allows you to charge your vehicle automatically

at the most convenient time for you, depending on the energy tariff and your departure time. Naturally, the most sustainable charge uses electricity from your own solar power system.

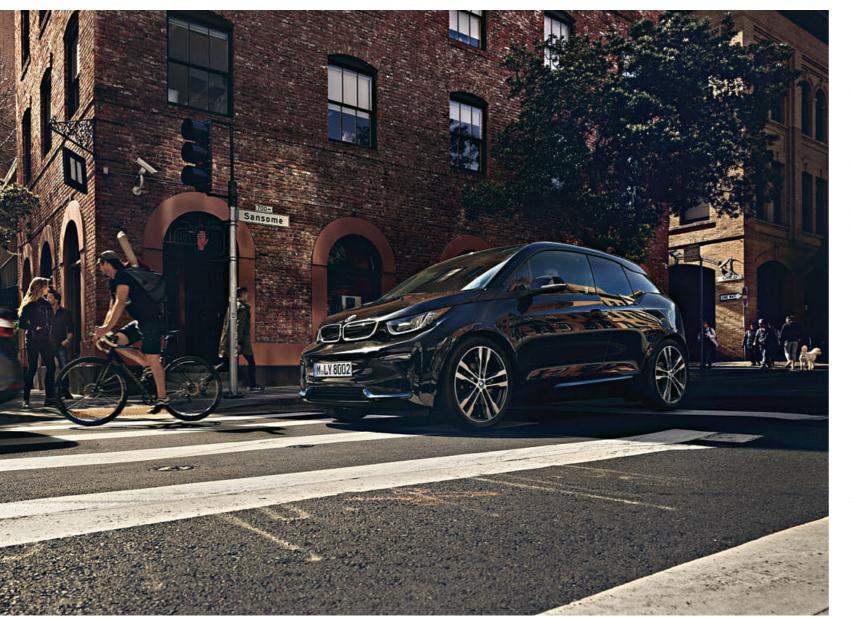

TO THE OFFICE. TO FRIENDS. TO THE GREAT OUTDOORS. AND BACK AGAIN. IS THE BMW i3 FLEXIBLE ENOUGH FOR MY LIFE?

Regardless of your destination, you'll get there with ease in the BMW i3 and the BMW i3s. Most people in the city don't travel more than 50 km a day, so you'll be all set with the BMW i3 and the BMW i3s, and the commute to the office and back will be no problem at all. With a range of up to 260 km² under common conditions you'll have plenty of leeway for paying friends in the country a spontaneous. You can even drive to the sea or the mountains for outdoor activities: The ChargeNow mobility service offers you the world's largest network of public charging stations – simple, convenient and always there when you need it.

For further information on range, fuel consumption and CO₂ emissions, see the technical data or contact your BMW partner.

¹ Dependent on local electricity infrastructure and the selected optional equipment.
² Range dependent on various factors. In particular: personal driving style, route characteristics, exterior temperature, heating/air conditioning, pre-conditioning.

DRIVING EFFICIENT DYNAMICS: BMW eDRIVE.

The **BMW eDrive** is a BMW original development. With a top power output of 125kW (170 hp) and maximum torque of 250 Nm in the BMW i3 and 135kW (184 hp) and torque of 270 Nm in the BMW i3s both models deliver a uniquely dynamic performance. But what does that mean in practice? Firstly, that maximum torque is available from the get-go. Once underway, both the BMW i3 and the BMW i3s put their power on the road almost instantaneously. A one-speed transmission does away with the need for gear changes and speeds up acceleration. The fact that you travel almost noiselessly and emit no exhaust fumes in the BMW i3 and the BMW i3s adds a new aspect to the sheer pleasure of driving a BMW.¹

DESIGNED FOR MAXIMUM EFFICIENCY AND DYNAMICS: THE DRIVE MODES.

The BMW i3 and the BMW i3s have a range of up to 260 km² in the standard COMFORT mode and under everyday driving conditions. However, you can extend this range. Using Driving Experience Control, you can select one of the highly efficient **drive modes ECO PRO** or **ECO PRO+** to further increase your potential range.

135 kW (184 hp)

and an unladen weight (EU) of only 1,365 kg⁴ combine to make the BMW i3s³ excitingly dynamic to drive.

"WHAT ARE THE ADVANTAGES OF AN ELECTRIC MOTOR?"

6.9s

to accelerate from 0 to 100 km/h in the BMW i3s. 5

16.2-16.5 kWh/100 km

Power consumption⁶ (in the BMW i3s approximately 3.77–3.93 euros per 100 km).⁷

ELECTRIFYING DYNAMICS, CHARGED WITH EXCITEMENT.

Everything about the BMW i3 and the BMW i3s is designed for electrifying driving dynamics and agility. It starts with the LifeDrive vehicle architecture, which is specifically designed for the demands of electric mobility, continues with the innovative BMW eDrive drive technology, and really gets going when it comes to precise, agile steering. The result is a unique driving experience that makes the dynamics of electric driving immediately perceptible in the BMW i3 and the BMW i3s.

BMW i3s SPORT SUSPENSION.

The **sport suspension** further increases the vehicle's dynamics and agility. The equipment includes tighter springs and dampers, along with a stabiliser on the front axle. Moreover, with the sport suspension the vehicle is lowered by ten millimetres.

BMW i3s SPORT STEERING.

The **sport steering** in the BMW i3s, which comes with a correspondingly adapted steering torque characteristic, delivers an even more athletic and tight steering experience. The vehicle can be guided with even greater pinpoint accuracy, adding to the driving pleasure especially on winding roads and in the city.

For further information on range, fuel consumption and CO₂ emissions, see the technical data or contact your BMW partner. Range dependent on various factors. In particular: personal driving style, route characteristics, exterior temperature, heating/air conditioning, pre-conditioning.

 ³ BMW i3 top performance: 125kW (170hp).
 ⁴ EC unladen weight for the new BMW i3: 1345kg. The EC unladen weight refers to a vehicle with standard equipment and does not include any optional extras. Unladen weight includes a driver weight of 75kg. Optional equipment may affect the weight of the vehicle, the payload and the top speed if the selected equipment has an impact on the vehicle's aerodynamics.

⁵ BMW i3 acceleration: 7.3s.
 ⁶ BMW i3 power consumption: 15.3–16.3kWh/100 km.

With BMW Green Energy's exclusive offer powered by Naturstrom, 100 km cost approx. 3.77–3.93 euros (at 0.269 euros per kWh – electricity price depends on the provider). The cost calculation is based on combined consumption (in accordance with NEDC). For further information please contact your local BMW partner.

To usher in the era of electric mobility, it was necessary to entirely reinvent the automobile. One of the greatest challenges was to compensate for the weight of the lithium-ion high-voltage battery. To solve this problem, the vehicle architecture was divided into two individual entities: Both the suspension and drive components as well as the battery are located in the lower aluminium Drive module. This means the entire space of the life module can be flexibly utilised by the driver and passengers. Here we succeeded for the first time in designing a standard passenger cell produced from exceptionally light and high-strength carbon fibre. This not only lowers the weight and centre of gravity of the BMW i3 and the BMW i3s – but also boosts safety and agility.

BMW EFFICIENT DYNAMICS.

LESS EMISSIONS. MORE DRIVING PLEASURE.

"HOW DOES THE LIFE-DRIVE ARCHITECTURE IMPROVE THE CAR'S HANDLING?"

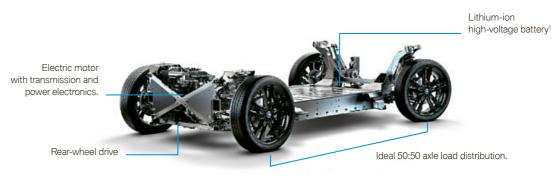

1,365 KG

is the weight of the BMW i3s in accordance with EC² directives, making it significantly lighter than comparable electric vehicles.

50%

lighter than steel, carbon is also exceptionally strong.

THE LIFE MODULE: SAFE LIVING SPACE.

The entire space of the **Life module** can be flexibly utilised. The driver and front passenger aren't separated from one another by a centre tunnel. There's no B-pillar between the side doors that swing open in opposite directions. The resulting generous loft atmosphere is unique for a car in this class. The spacious construction is made possible because the standard passenger cell is produced from high-strength carbon. This reduces the weight (EU) of the BMW i3 to 1,345 kg and that of the BMW i3s to 1,365 kg, providing both vehicles with unique agility while increasing their range.² At the same time, the robust carbon construction offers a high degree of safety, as demonstrated by numerous tests.

THE DRIVE MODULE: FOCUS ON SAFETY.

The **Drive module** consists of light aluminium and houses all drive-relevant components. Located in the rear, for example, are the electric motor and the transmission. The lithium-ion high-voltage battery is surrounded by a stable aluminium housing and is securely positioned in the undercarriage for the utmost in safety. Here the battery is optimally protected in case of an accident. Its position also provides the vehicle with a low centre of gravity that perfectly supports its agility. What's more, the battery is guaranteed for eight years or 100,000 km.¹

 ¹ The lithium-ion high-voltage battery is characterised by its long service life. However, should a defect occur in the high-voltage battery within eight years and the first 100,000 km, your BMW i Customer Care will grant you a free rectification. For details, please refer to the BMW i Battery Certificate.
 ² BMW i3 unladen weight (EU): 1345 kg. The EC unladen weight refers to a vehicle with standard equipment and does not include any optional extras. Unladen weight includes a driver weight of 75 kg. Optional equipment may affect the weight of the vehicle, the payload and the top speed if the selected equipment has an impact on the vehicle's aerodynamics.

OPTIMISED EFFICIENCY. INTELLIGENT ENERGY MANAGEMENT.

The combination of all the technologies in the BMW i3 and the BMW i3s serves as **intelligent energy management**, taking optimal advantage of the energy output and thereby ensuring the maximum range.

RELIABILITY GETS YOU AHEAD. THE DYNAMIC RANGE INDICATOR.

The **range display** in the BMW i3 and the BMW i3s informs you reliably about your range at all times. As simple as that sounds, it actually requires a complex program that can analyse a wide range of influential factors: Data on driving style, topography, temperature, driving mode, route planning as well as air conditioning and heating has to be evaluated in a matter of seconds. The result: a dynamic **range display** that's not only precise, but also analyses the influence of driving style and environmental factors.

Electric vehicles have to be electrically heated since they have no combustion engine to produce excess heat for this purpose. The production of electricity, however, can reduce the vehicle's range. That's why we developed an innovative **heat-pump system** especially for winter weather. The optionally available heat pump works fully automatically and supports the efficiency of the interior heating. This reduces energy consumption with undiminished heating comfort and enables a higher range in cold weather.

THE RIGHT TEMPERATURE – FROM THE WORD GO.

The lithium-ion high-voltage battery in the BMW i3 and the BMW i3s also has what could be termed a comfort temperature: approximately 20 degrees Celsius. At this temperature capacity and range are at their highest. In markedly cold or hot weather we recommend using the BMW Connected App to reach the **optimum operating temperature** before you start driving. This has a pleasant side effect: The app also lets you pre-heat the interior. Especially in winter, pre-conditioning provides improved comfort and increased range.^{1,2}

ELECTRIC DRIVING PLEASURE. MAXIMUM EFFICIENCY.

In the BMW i3 and the BMW i3s, the BMW eDrive electrical drive concept developed by BMW combines maximum driving pleasure with the highest efficiency: The innovative electric motor translates the energy of the lithium-ion high-voltage battery into an exciting, dynamic driving experience. At the same time, intelligent energy management settings ensure that the best possible performance is available at any time, e.g. when energy is recovered as soon as you take your foot off the accelerator. The result: ideal range and driving pleasure that turns every trip into an experience.

SAFETY CAN BE THIS COMFORTABLE.

Personal safety is still the highest priority in the BMW i3 and in the BMW i3s. This is achieved by measures such as the highly-rigid carbon construction of the passenger cell, designed for increased stiffness, and LED headlights with LED low beam and LED high beam or even Adaptive LED headlights¹ for ideal visibility. A wide range of innovative driver assistance systems in the BMW i3 and in the BMW i3s makes driving, and even parking, a particularly carefree and enjoyable experience.

i FOR INTELLIGENTLY CONNECTED.

Thanks to BMW Connected³, you can start your intelligent route planning from the comfort of your own home. You can share your live driving status with friends and business associates and keep an eye on all mobility related information via BMW Connected Onboard. You can even manage your smart home from inside the vehicle thanks to BMW Connected. Navigation system Professional features a new user interface and can be relied on to get you from place to place. Not to mention on-street parking information^{1,5,6,7} which even helps you find a parking spot. Other features such as Real Time Traffic Information^{1,6} keep you up-to-date and make sure you always arrive stress-free. Remote Services let you control your vehicle conveniently from a distance, for example by viewing the charging status of your car quickly and easily on your smartphone.

BMW i CONNECTED DRIVE SERVICES FOR NAVIGATION.

BMW i ConnectedDrive Services for navigation^{6,8} offers all of the information that makes electric driving easier and more convenient. The dynamic range map and range assistant make up its core. The ECO ROUTE function shows the most efficient route and displays charging stations along the way.

BMW ConnectedDrive Connected to be free.

INNOVATION AND TECHNOLOGY. 24 I 25

The Driving Assistant Plus¹ equipment produces a clear improvement in safety and comfort. It includes the Approach control warning and Person warning with light city braking function, Speed Limit Info⁴, Camera-based cruise control with Stop&Go function as well as the Traffic jam assistant.

The Park assistant package1,2 really does make parking a breeze. The system combines the Parking assistant with Park Distance Control (PDC) and the Rear view camera to make your life much easier. If desired, the assistant can even manoeuvre into a space fully automatically.

Available as optional equipment Only available for BMW i3.

- This feature is only available in conjunction with ConnectedDrive Services and a compatible smartphone. The range of functions depends on the apps installed on the smartphone.
- ⁵ The Speed Limit Info function is only available in conjunction with a variyation system.
 ⁵ On-Street Parking Information available only for selected models and markets. Only available in conjunction with ConnectedDrive Services and a navigation system.
 ⁵ Only available in conjunction with ConnectedDrive Services and a navigation system.

- The duration is three years.

⁶ Only available in conjunction with Intelligent Emergency Call. For more information, please visit www.bmw.com/ConnectedDrive or contact your local BMW partner.

Some ConnectedDrive Services may differ between countries. Please consult your local BMW partner for more information.

FULL CHARGE OF FLEXIBILITY.

The BMW i3 and the BMW i3s offer the perfect playing field for those who want to enjoy their lives in a flexible and mobile way: Whether you're at home or on the road, you'll find opportunities to charge your BMW i3 and your BMW i3s quickly, easily and anywhere with 360° ELECTRIC. With the extended mobility services of BMW i and a constantly-growing infrastructure, you'll be even more flexible and able to fully enjoy the pleasure of driving – any time and any place.

CHARGE AT HOME.

Open all hours. Your own charging point at home. Electrifying driving pleasure starts with the charging process - at your own charging point at home. The **BMW i Wallbox**² turns charging into a sustainable experience. All BMW i Wallboxes support quick charging, meaning that you can recharge your BMW i3 and your BMW i3s to 80% of their capacity in somewhat more than three hours, depending on the power supply.¹ The BMW i Wallbox Plus² enables you to control access via a chip card while its intelligent load management ensures that the electricity available from the domestic connection is at all times efficiently used for charging the vehicle. The BMW i Wallbox Connect² gives you access to all of the above functions and in addition gives you access to use all the features of the BMW Digital Charging Service. This means that - depending on your energy tariff - charging is automatically carried out at off-peak times and you can even charge your vehicle with sustainable, self-generated electricity from your own solar panels. The installation required is ensured by the BMW i installation service. The dealer arranges the installation.

Naturally sustainable: green power. Emission-free driving can be made even more sustainable if you use emission-free electricity. Sign up with Naturstrom AG and your car will be charged only with electricity generated 100% from wind power and hydro power. This means, you will produce no emissions whatsoever when you drive in fully electric mode. In addition, you can use the innovative solar energy systems by SOLARWATT GmbH to charge your BMW i3 and your BMW i3s with home-produced solar energy.

BMW i WALLBOX.

Charging the BMW i3 and the BMW i3s at home is made easy with three different BMW i Wallbox models to choose from. With their three-phase alternating current, they feature a charging capacity of up to 11kW and can charge the lithium-ion high-voltage battery in the BMW i3 and the BMW i3s in approx. three hours from 0 to 80%. The BMW i Wallbox models are easy to connect into the mains supply of a private home and the installation required is arranged by the BMW i installation service.

BMW i WALLBOX PLUS.

The BMW i Wallbox Plus combines fast charging with the newest technologies and first-class comfort. The built-in chip card reader with lock function ensures reliable access.

BMW i WALLBOX CONNECT.

The BMW i Wallbox Connect combines all technical possibilities of the new generation of BMW i charging products. WiFi functionality and BMW Digital Charging Service with accessible charging history enable a completely connected and comfortable operation.

CHARGING ON THE GO.

Electric driving pleasure is on the increase: thanks to more and more charging points. There are lots of good reasons to get out and about in your BMW i3 and your BMW i3s – and just as many opportunities to charge the battery. Whether you're shopping or travelling to or from work, you'll find that the network is expanding rapidly. And thanks to intuitive controls and the ChargeNow mobility service provided as part of 360° ELECTRIC, using it couldn't be easier. ChargeNow merges different providers' charging points into one huge network. This makes it much simpler and quicker to locate charging points and charge your BMW i3 and your BMW i3s. All available charging points are displayed in the navigation system, on the smartphone via the ChargeNow and BMW Connected App and on www.chargenow.com.¹

BMW DIGITAL CHARGING SERVICE.

Digital Charging Services² are fully automatic and allows you to charge your BMW at the best and most affordable time. You can rest assured that your vehicle will be fully charged in time for your next trip. Simply enter your departure time and electricity tariff, and Digital Charging Services will take care of the rest.

BMW CHARGING CABLE.

The **charging cable**³ allows the vehicle's high-voltage battery to be recharged using any domestic power socket. When not in use, the five-metre long cable can be tidily stowed away under the bonnet in the cable box so that it's always quickly at hand when on the move.

NOW MOBILITY SERVICES.

Our world is changing. And so is our idea urban mobility. The NOW mobility services perfectly match urban mobility needs. They are easy to use, intuitive, convenient and designed to meet individual requirements. They all share one goal: to make life easier for our customers and help you enjoy your everyday life – no matter where your journey takes you.

BMW i VENTURES.

BMW i Ventures invests in cutting-edge automotive technologies and innovative solutions focused on the needs of urban populations. It invests in high-growth companies with great potential when it comes to shaping the future of global mobility.

DriveNow is flexible car sharing of the BMW Group.

ParkNow is the innovative digital parking service from the BMW Group which enables ticketless and cashless parking on the roadside and in car parks via an app. The convenient start and stop function with up-to-the-minute billing means that you no longer receive any fines or pay too much.⁴

ChargeNow – operated by BMW's wholly owned subsidiary Digital Charging Solutions GmbH – offers a comprehensive service for charging in the world's largest network of public charging stations.

Only available in conjunction with ConnectedDrive Services and a navigation system.
 The duration is three years.
 The exact length of the BMW charging cable depends on the market.
 ParkNow only available in conjunction with the optional navigation package ConnectedDrive.
 Some ConnectedDrive Services may differ between countries. Please consult your local BMW partner for more information.

⁰¹ 30 % KENAF.

Through the extensive use of kenaf fibre, which is up to 30% lighter than conventional material, we have succeeded in replacing petroleum-based plastics and reducing the weight of the BMW i3 and the BMW i3s. This step is a tangible expression of the overall concept of the BMW i3 and the BMW i3s. The extremely light material is produced from a mallow plant that converts an exceptional amount of CO₂ into oxygen during its growth.

03 90 % EUCALYPTUS WOOD.

Eucalyptus is naturally resistant to moisture and therefore

requires about 90% less surface processing than conventional

wood. Because it's processed without chemicals, it retains its

silky texture and natural pore structure. With a height of 60 m,

the rapidly growing eucalyptus tree is ideally suited for

sustainable wood production. All wood used is grown on

FSC-certified plantations that insure forest sustainability.

⁰² 34 % PET.

Don't recycle, upcycle – the sustainable fabric used in the interior of the BMW i3 and the BMW i3s is made from almost 100% recycled polyester, 34% of which is sourced from PET bottles. PET granules undergo a process of melt extrusion and pigments are added to produce first the fibre, then the yarn and finally the fabric. The seat covers produced in this way aren't just pleasant to the touch and look appealing, they are also highly durable.

SUSTAINABLE MATERIALS FOR A UNIQUE AND PLEASANT ATMOSPHERE.

The materials used in the BMW i3 and the BMW i3s aren't only an experience for the senses. They also express a sustainable lifestyle, since they're largely made of recycled or renewable raw materials, such as eucalyptus. Even the processed carbon is manufactured in an environmentally friendly way through the use of regenerative energies. Sustainability is a distinct experience in the BMW i3 and the BMW i3s, threading its way through the entire production process.

RECYCLING.

The BMW i3 and the BMW i3s are up to 95% recyclable. The battery modules can, for example, be reused as solar energy accumulators. The excess carbon fibre is partially recycled for use in the production process.

PRODUCTION.

The carbon fibres are produced completely with hydroelectric energy. In Leipzig, we manufacture the BMW i3 and the BMW i3s using only electricity generated from wind power. The energy needed for their production is half of that required for other BMW models, which is low as it is.

No emissions are produced while driving. This reduces air pollution in cities. The BMW i3 and the BMW i3s are practically noiseless and produce no fumes. By fuelling with "green electricity" or producing your own power using solar cells, you can travel thoroughly emission-free. ECO PRO mode increases range and reduces power consumption.

EXTERIOR EQUIPMENT. INSPIRATION ACROSS THE BOARD.

"MY LITTLE ELECTRONAUT."

My weakness for gadgets means that I'm always open to new things, which is why I fell in love with electric cars from the word go. I was immediately impressed by the environmental aspect and futuristic design. Electric cars are all the rage – and it looks like the dream of an electric car is finally coming true. If you ask me, the future belongs shout over: "Hey, cool car." to the electric car and not the petrol engine. When travelling in the

BMW i3, the tranquil, calm atmosphere in the car causes my stress level to ease. I enjoy the feeling of sitting in this car with its chic interior and coolly steering it through the streets. And yes, it does actually happen that people stop in their tracks when I drive by and

"BE THE BEGINNING."

the enthusiasm like it was yesterday! Our little community has now a movement and it's happening right now.

I was lucky to be part of the BMW pilot programme for electric cars grown to three or four dozen electric cars and a few hundred people. right from the start back in 2009. Electric driving changed my life. And they say: "Drive my car, check out the interior, it's awesome, you Being part of this pioneering spirit was always a huge privilege. And should do the same!" It's an amazing sight to behold: My neighbour, I could barely wait to share it with others. Just four or five vehicles and my brother-in-law, the lady from the coffee shop downtown - they all a dozen people showed up when I organised the first electric car drive electric cars and love it! There's absolutely no doubt about it, the get-together in front of my restaurant in New Jersey. I remember big switch to electric driving is happening and it's unstoppable. It's

Wheel dimensions		5J x 19	5.5J x 20 / 6J x 20
Material		Light alloy	Light alloy

Dimensions of the BMW i3. Figures in [] are for the BMW i3s.

All dimensions in the technical drawings are given in millimetres. Luggage compartment volume 260-1,100 litres. The height of the BMW i3 with roof fin is 1598 mm. The height of the BMW i3s with roof fin is 1590 mm. Provisional figures; any missing figures were unavailable at the time of publication.

¹ The figures quoted are based on a driver weight of 75 kg. Unladen weight applies to vehicles with standard equipment. Optional equipment may affect the weight of the vehicle, the payload and the top speed if the selected equipment has an impact on the vehicle's aerodynamics. Electronically limited.

³ The data for fuel consumption, CO₂ emissions and energy consumption are determined in accordance with the measurements processes as defined by European Regulation (EU) 715/2007 in the applicable version. Data refer to a vehicle with base-level equipment in Germany, and the ranges account for differences according to the selected wheel and tyre size and the optional equipment. For these vehicles, values other than those specified here may apply for the assessment of taxes and other vehicle-related charges that are (also) based on CO, emissions. Version 01/18/2019

⁴ The lithium-ion high-voltage battery is characterised by its long service life. However, should a defect occur in the high-voltage battery within eight years and the first 100,000 km, your BMW i Agent will grant you a free rectification. For details, please refer to the BMW i Battery Certificate.
 ⁵ Range dependent on various factors. In particular: personal driving style, route characteristics, exterior temperature, heating/air conditioning, pre-conditioning.

⁶ Dependent on the local electricity infrastructure. Charging time corresponds to an 80% charge of maximum capacity. ⁷ 11kW 16A 3 phase.

Since 1 September 2017, certain new vehicles are tested according to the Worldwide Harmonized Light Vehicles Test Procedure (WLTP) before type approval is granted – The WLTP provides a more realistic way of measuring fuel consumption, range and CO₂ emissions. As of 1 September 2018, the WLTP will replace the New European Driving Cycle (NEDC). Due to the more realistic testing conditions, the fuel consumption and CO₂ emissions are, in many cases, higher and the range lower than when measured according to the NEDC. Currently, it is still mandatory to communicate figures based on the NEDC. For new vehicles with WLTP-based type approval, NEDC figures are derived from their WLTP figures. WLTP-based figures may, until their use becomes mandatory, be given in addition on a voluntary basis.

The BMW i3:

BMW eDrive synchronous electric motor, 125 kW (170 hp), Sport package, 20" light alloy wheels Double-spoke style 431 Jet Black with mixed tyres, exterior colour in Jucaro Beige with Frozen Grey metallic highlight, seats in cloth/Sensatec combination Electronic Carum Spice Grey with Brown accent, BMW i interior design Loft with interior trim finishers in Electronic Brown.
